- Parking Lots

HEALTH, SAFETY, AND ENVIRONMENT

At APTE, we provide frequent training to all employees that relate to emotional, physical, and mental well-being. Furthermore, on-site measures like protective equipment, regular inspections, identifying & eliminating unsafe working conditions and practices facilitate a safe workplace for our workforce.

Our ongoing training on safety procedures, personal conduct, safety discipline, accident reporting, personal protection, attention to tools & equipment, and first aid best practices help us to maintain a professional and safe working Environment.

At APTE, workplace safety is obligatory, and providing the right conditions and procedures for our workers will always be an essential aspect of our company culture. That's why we strive to further develop, improve and refine the working conditions of our workers and make the personal safety of every employee our primary concern. Over the years, APTE has established itself as a role-model for the safe operation of job sites and is known as a reliable and trustworthy construction company by benchmark setters for the construction industry.

PROJECT DIVERSITY

APTE expertise encompasses the construction of a wide variety of projects, including office buildings, retail and commercial centers, housing developments, industrial complexes, hospitals, and medical facilities, military and defense projects, hotels, schools, and educational facilities, as well as storage and warehousing projects.

SOME OF THE DIVERSE PROJECTS AMB HAS DELIVERED ARE :

APTE SCAFFOLDING & SOLUTIONS

Our full-service scaffolding solutions provide the access you need for any construction, maintenance, assembly, or related projects. We offer several systems (see our Products pages) that can be used in a variety of settings and configurations to suit your particular project needs. In addition, our various work platforms, elevators, and other components provide easy access to get personnel on-site and right to work, maximizing productivity on the job site.

We can provide design and engineering solutions using our scaffolding systems, assembly, safety, training, support, and disassembly. Transportation to the job site, erection and disassembly, inspection, training, and other related tasks are all available. We can also directly sell scaffolding to you or your subcontractors as desired.

APTE HVAC

Ducts are conduits or passages used in heating, ventilation, and air conditioning (HVAC) to deliver and remove air. The needed airflows include, for example, supply air, return air, and exhaust air. Ducts commonly also deliver ventilation air as part of the supply air.
